

INDEX 80/81

In response to all those people who wrote in last year wailing 'Where is it?', we present our new improved two-year Index for 1980/81. This year the index is even more helpful than usual, with all the individual Spot Designs and Tech Tips listed too — in fact everything's included except Digest (which is always up the front somewhere!) and the PCB pages, which are always up the back. All this is thanks to our newly-installed word processor, which makes this sort of thing as easy as falling off a bar stool.
